

☀ Beach School 🐟

Beach School enables children to develop first hand experiences with the natural environment. It creates an opportunity for children to develop and extend their knowledge of local places to them.

Enriching activities are planned into the Beach School sessions, allowing children to explore, investigate and develop their own understanding of the nearby environment.

We encourage children to be independent in their exploration, with practitioners scaffolding their learning to extend and develop their critical thinking further. All activities and areas accessed are risk assessed prior to the visit taking place. What is also important is to follow children's spontaneous interests, explore them further and take safe risks.

Parents are welcomed to Beach School events, it is a great opportunity to build relationships between home and school life. Beach school events have been a great success; children have built new relationships through sharing similar interests, parents have fed back how stimulating and engaging the sessions have been and everybody has had lots of fun.☀
