

# Farm School

We are now incorporating a Farm School into the curriculum at our provision.

The aim of Farm School is to educate children about farming in a sustainable countryside. To also develop knowledge about where our food comes from and develop their awareness of the leisure activities the local environment can provide.

Further aims:

- o Link to all aspects of the EYFS and National Curriculum 2014.
- o Allow children to experience first hand rural activities.
- o Inspire children to be motivated, excited and interested in the rural environment.
